

Earth Day 2023

Started in 1970, the annual celebration of Earth Day mobilizes 1 billion people for environmental change every year.

For Earth Day 2023, the ToolBank wants to assist our member agencies by providing tool handling credits to be used for their Earth Day service projects. We are looking for partners to help us outfit these charitable organizations for immeasurable change.

We have the tools, equipment & expertise for successful service projects and with your support, we'll help organizations & volunteers make Atlanta greener and healthier.

Earth Day Projects

Member agencies in good standing may submit Earth Day Projects for consideration. Participating partners will then have the opportunity to review submitted projects and allocate their designated credits to deserving organizations, giving them the opportunity to increase the impact of their Earth Day projects. Credit awards will be activated in our tool tracking platform, immediately accessible for member agency awardees to place tool orders!

Partnership Opportunities

Lead Partner | \$5,000

- Lead partner recognition
- Print and online media exposure
- \$500 in collective tool handling credits
- Logo on all tool order receipts in April

Community Partner | \$2,500
